Introduction

Strategic user experience designer specialising in high-stakes insurtech and enterprise SaaS ecosystems. Proven track record of untangling complex regulatory workflows for global insurers, turning legacy debt into intuitive, future-proof digital applications. Expert in systems thinking and design token architecture, with a demonstrated ability to bridge the gap between stakeholders, business architects, and engineering teams to protect project scope and drive business ROI.

Professional experience

Guidewire | UX design consultant (Professional Services)

Senior UX Designer

2025 - present

- UX Lead for a Tier-1 global enterprise insurance and asset management corporation operating in over 70 countries. Stepped into a core leadership role for an environment of extreme complexity, normalising years of legacy practices to design a modern white-labelled B2B2C digital application for motor and home insurance, targeting 65% of new business premium generated online and a 12-week partner onboarding cycle.

UX Designer 2

2023 - 2025

- Designed the payments process flow, a high-complexity logic journey, for a Tier-1 specialty insurance group and leading London Market commercial underwriter.
- Stepped up as sole UX lead for a multi-brand professional indemnity insurance portal, owning the end-to-end submission flow and theming configuration for 25+ global broker brands across EMEA.
- Graduated from the internal leadership programme and pioneered internal journey-mapping initiatives that documented and optimised the design-to-development hand-off process across global offices.
- Hosted the EMEA UX clinic, providing structured design critique and feedback to designers across the global Guidewire community.
- Interviewed 10+ UX designer candidates as part of building design capability within the Professional Services group.
- Mentored designers on design craft, stakeholder communication, and career development.

UX Designer

2022 - 2023

- Served as the first UX designer in the Global Service Centre consultants group.
- Worked on two Early Access projects, providing critical feedback to the product design and design system teams to improve Guidewire's design system and experience templates.
- Delivered internal design thinking workshop and coaching sessions.

Guidewire True Grit Digital Award 2024

Awarded for consistently demonstrating resilience, creativity, and a strong commitment during prolonged, challenging project conditions.

Tools & skills

Design	AI	Languages	Miscellaneous
Figma	Figma Make	HTML	Adobe CC

Previous experience

Solo cycling expedition

Europe to Asia
17 countries - 5000km
2018-2020

Image production editor

Irish Daily Mail & Evoke.ie
2016-2018

Picture desk staff

Sportsfile
2014-2016

Education

Master of Interaction Design - 2.1

National College of Art and Design
October 2020 - September 2021

Partner project with Temple Street Children’s Hospital

My major project was completed in partnership with Temple Street Children’s Hospital. The brief was to enhance the experience of sleep deprived patients and parents and reduce the costs associated with wasted EEG appointments due to anxiety, under-preparation and misinformation. I used extensive user research to design a new sleep deprivation guide and redesigned the department’s primary touchpoints.

Spark Innovation Award 2021

Mater-NCAD Design Week
Awarded for group project “In a Flap about Consent” which tackled the issue of obtaining truly informed consent from free flap surgery patients.

Other project work

- Understanding and communicating Dublin City Council’s Beta Innovation Model.
- Electromechanical Prototype to discourage mobile idle browsing.

Bachelor of Arts in Photography - First class honours

Institute of Art Design and Technology
September 2010 - June 2014
