

Where to find the Neuro Physiology Department when you get to Temple Street

We are located on the 3rd floor of “The King Unit” outpatients building.

- As you face the front of the hospital you will see a laneway to the right of the old main entrance, go down the lane way and then go in the first door on the right
- Once inside, turn left immediately and take the elevator to the third floor
- Ring the buzzer at the entrance to the Neurology Department

Game - Spray Challenge

1 Fill a small spray bottle with water

- Use some drinking water or spa water **(water that can't agitate skin)**
- Pack the bottle for your journey to hospital

2 Play some kind of game with your child

- A game like I-spy or whatever your child prefers
- Any time one of you scores a point, they get to gently spray the other with water
- The mist will help to keep your child **(and you!)** awake
